Setting up a Zotero Account transcript

In this screencast I will cover how to set up an account in Zotero, which will allow you to access or sync your Zotero library from different computers. There are several ways to set up an account in Zotero. If you have not already set up an account, one way to do this is by going to the Zotero tool bar, going to the Actions icon, then choosing preferences, go to the sync tab, and on the settings tab select create account. This link will take you to a registration page. Create whatever username you like. You will receive a confirmation email once your account is set up. Click on the link in the email to confirm your account set up. In the next screencast, I will talk about how to sync your Zotero library when you are using other computers.
