Interlibrary Loan and Scan & Deliver

Interlibrary Loan (ILL) and Scan & Deliver service is available to currently registered OSU students with a valid ONID account. You must be registered for credit each term to have access to this service. There is no additional cost to you and OSU Libraries pays for the cost of providing materials from other libraries.

- ILL and Scan & Deliver is a great service for your research needs. In addition to journal articles, book chapters and books, we are able obtain master’s theses, doctoral dissertations, conference proceedings, and newspapers among other materials.

- ILL is not good for obtaining textbooks and other course material. Textbooks are difficult to borrow, so expect long delays or cancellations. Items on Course Reserve are considered to be available and ILL requests will be cancelled.

To use ILL and Scan & Deliver, register with your ONID account:
https://osulibrary.oregonstate.edu/ill

How to expedite your request:

- Provide a complete citation
- Don’t try to decipher abbreviated journal titles. We will do it for you!
- Include ISSN/ISBN

Return borrowed ILL materials to the Circulation Desk, located on the main floor of the library.
Scan & Deliver

Scan & Deliver is a service that provides quick, easy access to OSU Library’s physical print collection (including microfilm and microfiche). Library staff will scan and electronically deliver a PDF of requested journal articles and book chapters to your ONID email. We aim to deliver scanned requests to you in 2 business days.

Some limitations apply. Due to copyright restrictions, this service does NOT include:

- Requests for scanning personal material
- Requests (single or combined from the same volume or book) for 50 pages or more than 30% of a journal or book
- Any item on Course Reserves
- Any items requested through ILL or Summit
- Maps
- Audio/visual materials
- Archival material
- Materials from Special Collections or Cordley Hall

*Note: Your Interlibrary Loan and Scan & Deliver account are one in the same.*
