Republican Policy.

It is a fact which few gentlemen of the party who write or speak in behalf of that party can deny, that we are as a party charged with favoring the sectional interests of the North at the expense of the South. That large numbers of that party individually believe in the political doctrine which they assert to be the policy of the Republican party as a whole, that we have no fault, but we do judge that their political declarations of it are false, and that in the practical results of their actions it is far from correct. There is no one thing that we expect more than this, that they will govern the country as they govern the state of New York. We believe that the Republican party, as it has been organized, and as it is now organized, is the party of the North, and that it is not, and never has been, the policy of the party to govern the country in a manner that is different from the manner in which the state of New York is governed.

What is the Policy of the South?

The Southern policy, as we understand it, is the policy of the Democratic party, which it claims to be the Democratic party. The Southern policy is the policy of the Democratic party, as it has been organized, and as it is now organized, is the party of the South, and that it is not, and never has been, the policy of the party to govern the country in a manner that is different from the manner in which the state of New York is governed.
